COST Action CA24158

Disparities In Surgical Specialization and Education in Cancer Training (DISSECT)

Call for applications for dissemination conference grants

for implementation from 1 November 2025 to 31 October 2026

Call 1

1. About DISSECT

Cancer surgery remains a key treatment for solid malignancies, particularly in low- and middle-income countries (LMICs) where access to newer therapies is limited. With the growing global cancer burden, the demand for high-quality surgery will rise. As precision medicine advances, cancer surgeons need not only technical expertise but also an understanding of multidisciplinary cancer care, preventive and palliative care, clinical trials, and effective communication. However, disparities in surgical oncology training exist across Europe, affecting access to complex cases, clinical trials, mentorship, and research facilities. These variations are linked to economic disparities, leading to differences in patient outcomes.

The DISSECT project aims to identify and address these disparities in cancer surgery training in Europe. By fostering knowledge exchange between high- and low-resource settings, the project will enhance multidisciplinary training, mentorship, and research capacity. It aligns with Europe's Beating Cancer Plan to ensure equitable access to high standards of care and to reduce cancer-related inequalities. DISSECT seeks to create a sustainable impact on cancer surgery outcomes through improved training and innovation in surgical education.

The main objective of the DISSECT Action is to create a cohesive network and identify the critical gaps and variabilities in cancer surgery training in Europe. The consortium aims to leverage on knowledge exchange between high and low-resource settings, strengthen the multidisciplinary approach, integrate patient partnership and facilitate mentorship in cancer surgery training, and foster research and surgical innovation. This will be done through achievement of our objectives:

1. Perform a needs assessment to identify areas of cancer surgery training disparities through surveys and focused group discussions.
2. Organize at least two multi-stakeholder meetings within the funding period to develop a roadmap to address critical areas of disparities in cancer surgery training and assess its impact.
3. Identify five priority areas of disparities in cancer surgery training where collaboration from high and lower resource settings can have meaningful impact.
4. Generate at least five open access publications from the DISSECT network in peer-reviewed journals.
5. Facilitate knowledge exchange and a multidisciplinary team approach between high and low-resource settings
6. Conduct joint MDTs with virtual clinical discussions between paired high and low resource institutions within the network DISSECT
7. Assess the impact of these joint MDT sessions on patient outcomes, surgical decision-making

Funded by the European Union

among young surgeons and research output among trainees.
8. Develop learning pathways and tailored mentorship programs for surgical trainees dedicated to patient-focused cancer research, effective leadership, communication, and innovation
9. Develop and assess the feasibility of a tele-mentoring program for surgeons to improve competency in cancer surgery, decision-making for complex clinical cases, and predicting surgical outcomes

Five working groups (WG) focus on work as follows:
- WG1. Identification & evaluation of disparities
- WG2. Building research capacity
- WG3. Multidisciplinary teams (MDT) knowledge exchange
- WG4. Surgical mentorship
- WG5. Innovation

Detailed information on the planned activities in the Working Groups can be found in this document.

2. What is a dissemination conference grant

A dissemination conference grant supports an oral presentation of the work of the Action by an Action participant at a high-level conference fully organized by a third party, i.e. not organized nor co-organized by the COST Action. This presentation should significantly increase the visibility of the Action in the research community, contribute to increasing visibility of the presenter, and attract additional participants and stakeholders. It must disseminate Action results to relevant end-users at high profile conferences in the field on a topic relevant to the Action.

3. Open call

Applications should support the DISSECT objectives and Working Groups as described in this document. This call is open-ended. There is no set deadline. Each application will be processed on a first -come first-served basis. It is especially aimed at dissemination conference grant that will be implemented from November 2025 to October 2026.

4. Eligibility

Dissemination conference grant are available to applicants employed by, or affiliated to, an institution, organization, or legal entity in a **COST full/cooperating member country** or a legal entity in a **near neighbour country (NNC)**. Institutions or entities based in International Partner Countries (IPC) are not eligible.

The eligible countries are listed in COST Documents & Guidelines, particularly, in the Country and Organisations Table.

5. Financial support

The financial support provides a contribution for travelling, accommodation and subsistence expenses, insurance costs, conference registration fee, and any publication costs arising.

The financial support is provided in the form of a grant. No invoices are required. The maximum grant amount is EUR 2,000. For this year's work and budget plan, the average for a dissemination conference grant is set on €1,500.

Funded by the European Union

6. The grant awarding process

The supported activity must be carried out entirely within one grant period. Each grant period runs from the 1 November until the 31 October of the following year.

Applications will be evaluated for their quality and for their relevance to the objectives of DISSECT and its Working Groups. To avoid time-wasting, each application will be first screened by the Grant Awarding Coordinator to check that it is complete and that it is relevant to the Action. Incomplete applications are rejected with the possibility to resubmit. Irrelevant applications are also rejected and cannot be resubmitted.

Following the passing of the screen, each application is reviewed by two (or three in case the outcome is not consistent) relevant Action members who are guided by the Grant Awarding Coordinator. This assessment considers the relevance of the presentation and of the conference to the Action and its dissemination potential. The Grant Awarding Coordinator advises the Action Chair who acts on the advice if the budget allows. Successful applicants receive a grant letter.

7. Application procedure

Applicants must have an e-COST profile and applications must be submitted online in e-COST via Apply for a Grant and selecting the 'dissemination conference grant' option.

In addition to completing the fields, the following should be uploaded:

1. Copy of the abstract of the accepted oral presentation
2. Acceptance (or invitation) letter from the conference organizers
3. Alignment with the Action Science Communication Plan
4. The financial plan clearly indicating the expected costs (e.g., transport, accommodation,..)

Documents that cannot be uploaded via the e-COST interface should directly be sent to Grant Awarding Coordinator, Sarah Cosyns (sarah.cosyns@ugent.be).

8. Submission of the report and payment

Once the activity has ended, the applicant claims the payment of the grant via e-COST. For this, the grantee submits the dissemination conference grant report using the report template, and relevant documentation within 30 working days of the completion of the mission.
The report includes:

- A report on the contacts made and potential for future collaborations.
- The certificate of attendance to the conference.
- The program of the conference or book of abstracts / proceedings indicating the oral presentation of the grantee.
- A copy of the given presentation.

Failure to submit the grant report within 30 days will effectively cancel the grant. The Grant Awarding Coordinator is responsible for approving the grant report and informing the Grant Holder that the dissemination conference grant has been successfully accomplished. After receipt of the approval by email, the Grant Holder will execute the payment of the grant.

Funded by the European Union

Notes:
Each publication produced with support of a dissemination conference grant must acknowledge the support of the COST Action and whenever possible use the COST and DISSECT logos (on slides and posters).
